You expect top performance from Case skid steer and compact track loaders. Case gives you more.

The new Case 400 Series 3 feature Tier III-certified turbocharged engines that deliver more power and torque. Our redesigned cab delivers more room, better visibility and ergonomically designed controls. We even give you more “extras” like ride control, air conditioning, parts and 2 speed options.

Want more? With Case, you get world-class parts and service from responsive dealers. It all adds up. We give you more ways to be more productive.

More power and torque

Get more done, faster. For each size class, Case offers a skid steer or compact track loader to give you the power and control to get the job done right. Our machines are designed to take punishment – and keep on delivering. Each model features new, clean-burning, turbocharged, Tier III-certified engines to deliver increased horsepower and improved torque – giving you the muscle and control to get the job done quickly.

For pushing or digging work, such as finish grading or material distribution, choose from radial-lift models of skid steer and compact track loaders – 410, 420, 420CT, 430, 440, 440CT, 450 and 450CT.

For lift-and-carry jobs, such as loading rock or mulch into a truck or placing pipe onto a trailer, choose from vertical-lift models – 435, 445, 445CT and 465.

Engineered for the toughest jobs

The 400 Series 3 machines were designed with countless applications in mind. From excavating to truck loading to road building, Case skid steer and compact track loaders deliver.

- Large displacement, high-torque engines for maximum productivity.
- Low-effort controls for increasing operator comfort and improving productivity.

- A tough, fully welded unitized chassis design that delivers long product life.
- Our tough, fully welded loader arms are designed to rest low on the chain tanks and use the chassis to support the arms when digging – reducing costly wear and tear.
- Case loaders feature straddle-mounted pins and bushings to deliver more support and strength to the loader arms.
- A new easy to clean side-by-side radiator and oil cooler improves cooling, performance and serviceability.
- Heavy Duty hydraulic pumps with large hydraulic tank capacity.
- High flow hydraulics option for high attachment performance.

New cab boosts operator comfort

We know increasing operator comfort boosts productivity. That's why we redesigned our cab. It includes a full suspension seat, increased headroom and visibility, ergonomically designed controls – and a lot of extras like industry-exclusive side lighting, a 12-volt power plug, storage tray and cup holder.

Want more? You can customize your Case loader with a pressurized cab, heat and air conditioning, hydraulic coupler, radio with MP3 player port, a heated seat and more.

Ease of service increases uptime

The easier it is to perform daily service checks and maintenance, the more likely it will get done. That's why our skid steer loaders and compact track loaders provide outstanding ease of service.

- Each model features a single-location service point at the back of the machine to make daily checks fast and easy – including the engine oil dipstick, air filter and hydraulic and coolant level sight gauges.
- Our exclusive easy-tilt ROPS gives fast, easy access to major components when maintenance or service is required.
- The remote oil drain helps avoid spills and speeds up oil changes.
- A no-maintenance fan belt saves time and money. (except 410)

With all these new service and maintenance features, you'll spend much less time and money maintaining your Case skid steer loader or compact track loader than competitive models. Plus, with Case, you get world-class support from responsive dealers by calling 1300 99 CASE.

400 SERIES 3
